

## **Buy a Brick - Hollinwood Scout Camp, Worsley, Manchester, M28 1FE**

**Please pass this onto the relevant person in your organisation. Or, if you ARE that person please do consider supporting this amazing cause**

Many thanks for taking the time to read this! We hope that your organisation will want to get involved in our **#BuildHollinwood** project which will benefit young people across Greater Manchester and the North West.

Bricks cost £1,000 and businesses who support the cause will go on our 'Wall of Fame' in our reception building as well as having your logo featured on our website.

Of course, buying 1 brick would be amazing but the number of bricks you buy is up to you! We will only be able to do this from support of organisations such as yours.

Buying a Brick means that you are contributing to the building of a toilet and shower block: **essential for Hollinwood to be able to open.**

### **Our Story**

Hollinwood Scout Camp is the only scout camp in Salford. We moved from Middlewood in 2017 to vacate for the new RHS Bridgewater Garden and we have 30 acres of woodland and fields which are available for any uniformed group (such as Scouts and Guides) to come and use, as well as local community groups.

We have no permanent buildings other than literally a port-a-loo. So, we are stuck in the position where we have room to accommodate 100's of young people to enjoy the outdoors but nowhere for them to use a toilet or to shower (necessary for overnight stays and particularly for adult volunteers). The single port-a-loo means that we are strictly limited to allowing a very small number of children to use the site.

Our goal is to ultimately raise £1,000,000 to fund *all* of our building construction but the toilet block is a priority and is costed at £250,000 (including water treatment works). These costs have been properly assessed by architects / quantity surveyors and a more detailed break down is available on request.

We have approximately £140,000 of this money raised already. Some basic information is below:
